6mm Jovanovic Osteotome	OSTJ08	
1 Mead Mallet, Nylon Ends	MAL1	

Hu-Friedy's Fundamental Concepts in Implant Dentistry was created to be a complete guide on the full life cycle of the implant. The guide begins with patient assessment and site preparation, covers implant placement and prosthetic selection, as well as implant maintenance and care for peri-implantitis.

To accompany the guide, Hu-Friedy has developed suggested instrument kit lists which correspond with the topics covered, including: Atraumatic Extraction Socket Preservation, Sinus Lift - Lateral, Sinus Lift - Crestal, and Ridge Augmentation.
